

LET EXPO

11-14 March 2025

Business Presentation

LET EXPO

The fair on transport,
green logistics, and
services

At the Verona Exhibition Center, the fourth edition of LetExpo - Logistics Eco Transport will take place, a unique event that has become the largest fair in Italy dedicated to transport, sustainable logistics, and 360-degree services.

This edition will feature the participation of leading companies, professionals, and institutions in the sector, offering a wide showcase of the latest innovations, green technologies, and integrated solutions to enhance efficiency and sustainability in modern transport and logistics.

Promoted by ALIS and organized by ALIS Service in collaboration with Veronafiore, LETExpo stands out for its innovative format that combines business, sustainability, and intermodality.

Why visit LET Expo?

INNOVATION AND SUSTAINABILITY

LETExpo is a platform that promotes the latest technologies dedicated to sustainable transport and logistical efficiency. The event offers a wide range of cutting-edge solutions for digitalization, clean energy, and smart mobility. The showcased innovations aim to reduce environmental impact, improve energy efficiency, and encourage the use of alternative fuels, with a particular focus on intermodality and sustainable urban mobility.

INTERNATIONAL NETWORKING:

The event represents a unique opportunity to interact with key players in the industry, both nationally and internationally. Leading companies in land, maritime, and rail transport, along with global stakeholders, come together to share best practices and discuss future challenges related to green logistics. B2B meetings foster new collaborations, while the presence of government representatives helps create dialogue between the public and private sectors.

TRAINING AND DEVELOPMENT:

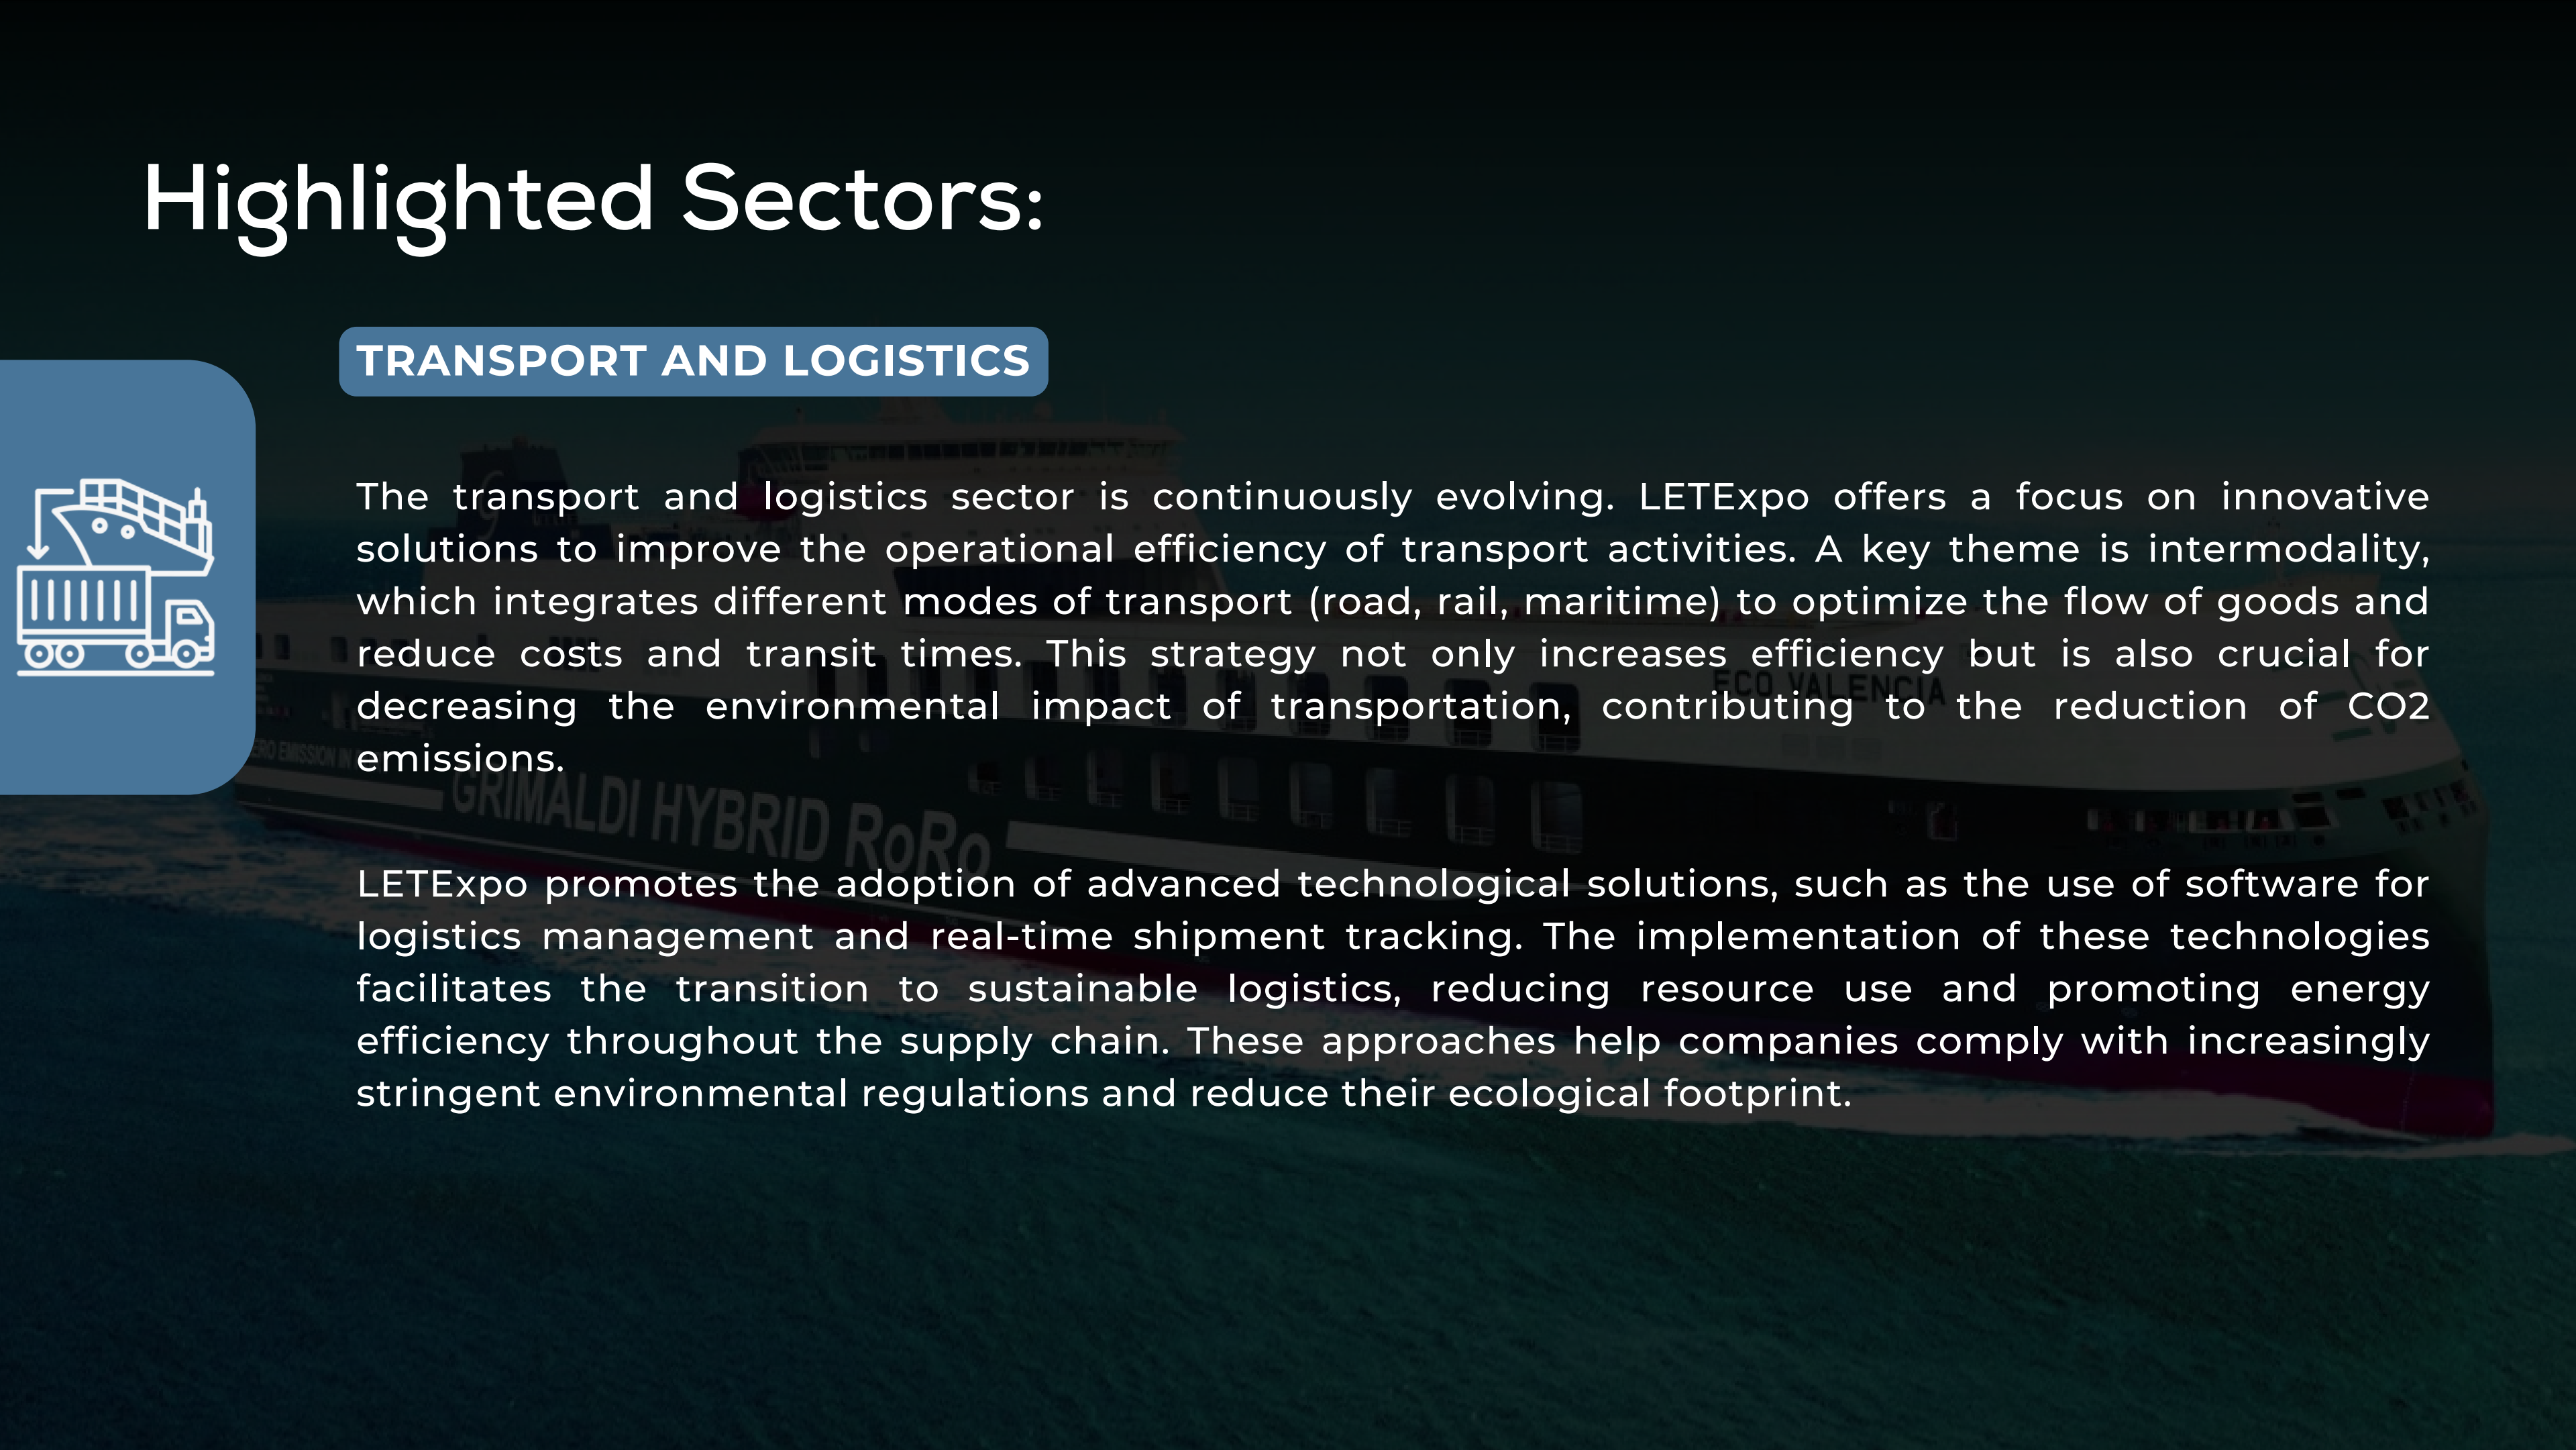

LETExpo is not only a place for doing business but also an important showcase for training. Through conferences, workshops, and seminars, participants have access to training sessions covering a wide range of topics, from new technologies to sustainable business models. Additionally, the event includes a section dedicated to Job Opportunities, where companies can meet young talents and professionals seeking new opportunities in the green logistics sector.

Highlighted Sectors:

TRANSPORT AND LOGISTICS

A white line-art icon on a blue background showing a truck on the left and a ship on the right, with an arrow pointing from the ship to the truck, symbolizing intermodal transport.

The transport and logistics sector is continuously evolving. LETExpo offers a focus on innovative solutions to improve the operational efficiency of transport activities. A key theme is intermodality, which integrates different modes of transport (road, rail, maritime) to optimize the flow of goods and reduce costs and transit times. This strategy not only increases efficiency but is also crucial for decreasing the environmental impact of transportation, contributing to the reduction of CO2 emissions.

A dark, atmospheric photograph of a large cargo ship at sea at night. The ship's name 'GRIMALDI HYBRID RoRo' is visible on its side. The ship is illuminated by its own lights, creating a strong contrast against the dark water and sky.

LETExpo promotes the adoption of advanced technological solutions, such as the use of software for logistics management and real-time shipment tracking. The implementation of these technologies facilitates the transition to sustainable logistics, reducing resource use and promoting energy efficiency throughout the supply chain. These approaches help companies comply with increasingly stringent environmental regulations and reduce their ecological footprint.

Highlighted Sectors:

SERVICES FOR TRANSPORT AND LOGISTICS

Advanced software solutions and services for fleet and logistics management are transforming the industry through closer integration of digital technologies and operational processes.

Fleet Management Systems (FMS) allow companies to monitor vehicles in real-time, optimize routes, and reduce maintenance and fuel costs via efficient data management and predictive analytics. Telematics and geolocation tools enable optimal delivery management, enhancing punctuality and minimizing unforeseen issues.

The digitalization of logistics processes opens new automation opportunities, such as automated warehouse management and the use of artificial intelligence for inventory optimization. Integrated management platforms facilitate real-time communication among all supply chain stakeholders, from suppliers to end customers, ensuring greater transparency and traceability of operations.

Digitalization not only streamlines processes but also enables the adoption of more sustainable solutions, such as reducing emissions through intelligent route planning and utilizing low-emission vehicles. Additionally, cloud platforms provide immediate access to data and analytics, enhancing real-time decision-making and allowing for agile and flexible logistics operations.

Highlighted Sectors:

SMART MOBILITY

Represents one of the pillars for the transition towards a more sustainable and interconnected future. This transformation goes far beyond the introduction of electric vehicles and low-impact buses: it is an integrated ecosystem involving new technologies to improve the quality of life in urban areas. Electric cars, zero-emission buses, and smart infrastructure are only part of the picture. Smart mobility includes the use of advanced traffic management systems, IoT (Internet of Things) sensors for real-time monitoring, and the interconnection between vehicles and road infrastructure, such as smart roads.

The goal is to create smoother urban mobility, reducing congestion and accidents while also promoting greater environmental sustainability. In this context, technologies like artificial intelligence, machine learning, and big data allow for the analysis of traffic flows and the optimization of resource use, improving energy efficiency. Initiatives like Mobility as a Service (MaaS) integrate various modes of transport (cars, bikes, public transportation) into a single digital platform, offering citizens personalized and more sustainable travel solutions.

Highlighted Sectors:

TRAINING RESEARCH AND DEVELOPEMENT

Training and skill development in the green logistics sector are crucial to addressing future challenges in sustainability and innovation. LetExpo collaborates with research institutes, universities, and vocational training centers to promote a culture of sustainable logistics and provide young professionals with the skills they need to enter this rapidly evolving sector. Through joint projects and applied research programs, innovative solutions are developed to meet companies' efficiency and sustainability needs.

Opportunities for young talent are not limited to theoretical training.

Thanks to **internships, apprenticeships, and direct collaborations with leading companies** in the sector, LetExpo offers practical experiences that allow the application of acquired skills.

ALIS Academy, for example, is a space dedicated to career guidance and recruitment, where participants can meet key industry players and explore career opportunities. In this way, LetExpo acts as a bridge between the academic and professional worlds, creating synergies that foster both professional and personal development.

Scheduled Activities

CONFERENCES AND WORKSHOPS

Over the four days of the fair, numerous conferences and workshops will take place, featuring the participation of Ministers and other institutional figures. These key speakers will contribute to the discussion by offering an institutional and regulatory perspective.

The main topics covered include:

- The Future of Green Logistics: Strategies for making logistics more eco-friendly and efficient.
- Technological Innovations: Cutting-edge solutions for smart transportation and mobility.
- Continuous Training: New educational opportunities for logistics professionals to stay ahead in the industry.

B2B MEETINGS

In addition to educational events, LETExpo serves as an ideal platform for B2B meetings. It offers dedicated spaces where participants can discuss new business collaborations and innovative projects, fostering meaningful connections within the industry.

DEMOS AND WORKSHOPS

Throughout the fair, exhibiting companies will have the chance to showcase practical demonstrations of their innovative solutions. This allows visitors to directly test and experience the latest technologies firsthand, giving them a deeper understanding of the advancements in the field.

Why Exhibit at LETExpo?

- **NATIONAL AND INTERNATIONAL VISIBILITY:**

Participating in LETExpo provides access to a vast network of contacts both domestically and internationally. Exhibitors gain significant exposure, helping them connect with key players in the logistics industry on a global scale.

- **INNOVATION AND MARKET TRENDS:**

The expo offers a prominent platform to showcase technological innovations and stay updated on emerging market trends. It serves as a key event for companies looking to introduce cutting-edge solutions and understand where the market is heading.

- **GROWTH AND TRAINING:**

Continuous learning opportunities through workshops and conferences. Additionally, the "Job Opportunities" section is dedicated to internships and job placements to promote the growth of talent in the green logistics sector.

- **NETWORKING:**

Networking: Direct connections with key stakeholders in the industry, including investors, partners, and clients.

Numbers of 2024 Edition

100.000 visitors

400 exhibitors

60.000 m² of exhibition space

350 speakers

12 Ministers, Deputy Ministers, and Undersecretaries

A stylized Earth from space, showing the continents of North and South America. The text 'LET' is overlaid in a large, white, bold, sans-serif font. The letters are slightly shadowed, giving them a 3D appearance as if they are floating above the planet.

11-14 March 2025

IS COMING

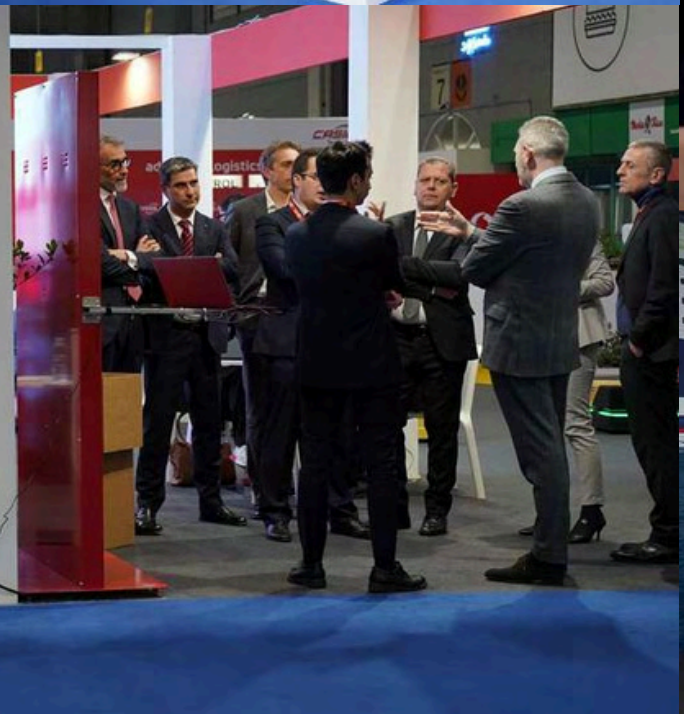

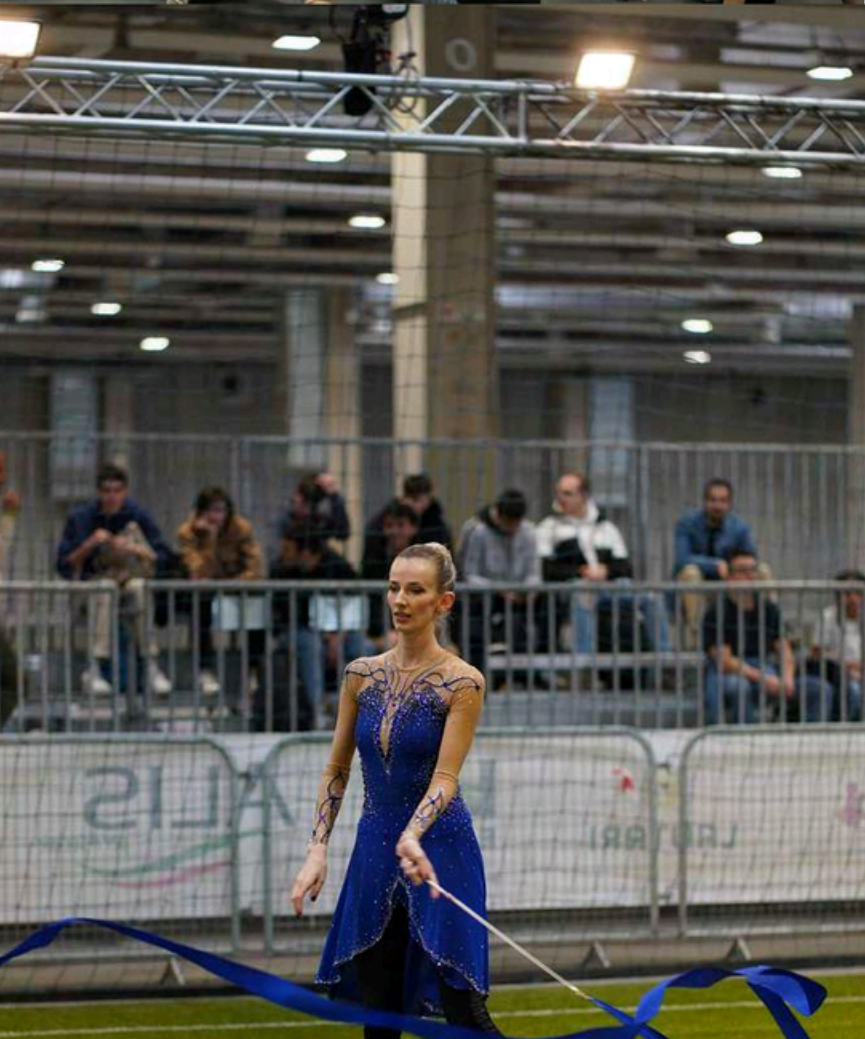

2025 Edition

The **fourth edition of LETExpo** is preparing to welcome professionals from the transport and logistics sector, confirming itself as one of the most anticipated events of 2025.

The fair continues to maintain its primary objective: **fostering the growth of the sustainable logistics sector**, offering a wide range of opportunities for companies, experts, and stakeholders to meet, with a focus on innovative and sustainable solutions.

Thanks to the well-established collaboration with industry leaders and international institutions, LETExpo 2025 will offer a unique experience to discover new market trends, foster strategic partnerships, and promote the transition towards greener and more efficient logistics.

The exhibition areas and workshops will remain central to the sharing of best practices and cutting-edge technologies.
